Glaze and Paint

Glaze over stain – glaze is applied over the top of the base stain and then hand wiped for a unique finish. Since glazed cabinetry is hand finished, no two doors are exactly the same.

Glaze over paint – the profiles of doors, drawer fronts and large mouldings are highlight glazed by hand. The highlight glazing affects only the areas where the glaze is applied, the rest of the product does not change color. Since glazed cabinetry is hand finished, no two doors are exactly the same.

Painted finishes offer a classic look for cabinetry and have inherent characteristics that differ from stained cabinetry. Please ask your designer for complete details. Signed Paint Awareness Form required prior to purchase.
